

TOPIC 4

June 3 Environmental and sanitary impact	1 Kristian Hemstrom	Relevant leaching and testing procedures for ecotoxicological hazard and risk characterisation of ash
	2 Ton Honders	Risk-based soil quality standards in The Netherlands – a new approach towards the sustainable reuse of soil
	3 Kris Broos	Health impacts of the use of secondary aggregates in building materials
	4 Bernard Clément	Ecotoxicological risks of road runoff water sediments on aquatic ecosystems
	5 Mohan Sankaralingam	Environmental impacts of construction sand mining on rivers: a case study
	6 Marie Coutand	Ecotoxic evaluation of mortar leachate using the amphibian larvae (<i>Xenopus laevis</i>)
June 3 Multicriteria analysis - decision and policy making tools	7 Kosuke Kawai	Effects on waste utilization for depression of natural resources consumption, landfilling and greenhouse gas emission in the cement production process in Japan
	8 Cong Chen	Environmental evaluation of mineral additions in concrete.
	9 Sébastien Lasvaux	Modeling the recycling processes in the LCA of buildings
	10 Margarida Quina	Life Cycle Assessment as a Tool for Evaluating the Valorization of APC Residues from MSW Incineration in Lightweight Aggregates
	11 Jacques Villeneuve	The FORWAST project: Design of future waste policies for a cleaner Europe.
	12 Kevin Gardner	Life-cycle assessment of construction and demolition derived biomass/wood waste management

June 5 Economy, regulation sustainability and territorial metabolism	1 Rebecca Hooper	Carbon and financial savings associated with recycling utility trench arisings
	2 David Hann	Business case for using microwave technology to produce a lightweight aggregate
	3 Kevin Gardner	Use of Industrial By-Products in Urban Transportation Infrastructure: life cycle argument for increased industrial symbiosis
	4 Angel Irabien	Environmental sustainability evaluation of secondary materials: Case Study, Secondary materials from felloalloys manufacture
	5 Daaf de Kok	Use of Concrete with granulates in The Netherlands : observed barriers in the market and logistics and possible solutions
	6 Ton Honders	New legislation on the sustainable reuse of lightly contaminated soil in The Netherlands
