

Announcement Training Course

## Leaching Assessment and LeachXS

INSA

Lyon, France

June 2, 2009

9.00 – 16.30

In conjunction with WASCON 2009 (3 - 5 June 2009)

LeachXS-Orchestra, is a database/decision support tool for characterisation and environmental impact assessment of (contaminated) soil, sludge, compost, sediments, various types of municipal, industrial and hazardous wastes, mining wastes, preserved wood, treated wastes, stabilised waste and construction materials based on contaminant release as derived from leaching tests.

Aspects to be covered: comparison of different leaching tests, statistical data evaluation and quality control options, comparison of lab, lysimeter and field data, geochemical speciation modelling of leaching test data, predictive modelling of release in different exposure scenarios, Building Materials Decree model, data input tool, LeachXS Lite, reporting functions.

**Workshop duration:** 1 day

**Requirements:** laptop with minimal 750 MB RAM and 1.6 GHz processor.

**Cost:** free (lunch at own cost)

**License:** free use of LeachXS Pro for one month following the WASCON conference

**Workshop Convenors:**

Hans van der Sloot  
Andre van Zomeren  
David Kosson  
Ole Hjelmar

**Registration:** email to [vandersloot@ecn.nl](mailto:vandersloot@ecn.nl) before May 25, 2009
